## LASRUG

### Lancaster and Skipton Rail User Group

LASRUG exists to represent present and potential users of the Leeds-Lancaster-Morecambe railway. The line links the towns and cities of West Yorkshire with the city of Lancaster and the seaside resort of Morecambe. It gives access to the southern part of the Yorkshire Dales, and is a vital link for the rural communities along the route. At Leeds and Lancaster, there are main-line connections to all parts of the country, and Carnforth provides connections to the Furness Line and the Cumbrian Coast.

The group was formed in 1989 to support, retain, develop and improve the Lancaster to Skipton line, to encourage greater use of public transport and to press for an integrated rail/road network in the Craven/Lancaster area. Our principal aim is a more frequent train service to accommodate people's business and leisure needs. We also want to see a full Sunday service and more suitable trains on the route.

We do all we can to promote the line and to assist where possible with any problems passengers may have. We work closely with the various local authorities and tourist bodies, with the train operator Northern Rail, and with other rail user groups. Our website describes the line fully and provides news about train services and local events :

### Community Rail Strategy

LASRUG is a member of the Leeds - Morecambe Community Rail Partnership, which is working to involve local communities and other stakeholders in the development of the line and to bring more passengers onto the trains.

If you would like to be part of the support for this route, you can join LASRUG for £5.00 per year. Please send a cheque for £5 payable to 'LASRUG' to Membership Secretary, Lakeber House, Robin Lane, High Bentham, Lancaster, LA2 7AF and include your name, address and contact details (or fill in the form below.) Your membership helps us to campaign for the line and you receive a newsletter quarterly about developments and projects. The AGM is held in Bentham Town Hall with a speaker connected with railways.
